

My LinkedIn Profile

1. Headline

AI Developer | Agentic Systems & Technical Design | Building Intelligent Multi-Agent Architectures & Real-Time 3D Systems

2. About (Summary)

I'm an **AI Developer** and **Technical Designer** who bridges the gap between creative vision and technical implementation.

My journey began in structural design, giving me a disciplined foundation in systems thinking and visualization. Today, I apply that architectural mindset to software. I don't just write code—I **orchestrate intelligent systems**.

I specialize in **Agentic AI**, designing multi-agent architectures (using frameworks like CrewAI, LangGraph, and AutoGen) that solve complex problems autonomously. I also bring deep expertise in **Game Engines** (Unity/Unreal), combining logic with high-fidelity visualization.

My Core Focus Areas: * **AI Agent Development:** Building autonomous agents that interact with tools and APIs * **Context Engineering:** Architecting how systems efficiently process and retain information * **Game Engine Expertise:** Developing complex interactive systems and mechanics in Unity & Unreal Engine * **Full-Stack Production:** Shipping robust applications with Next.js, Python, and TypeScript

I'm currently open to roles in **Technical Architecture**, **AI Integration**, and **Full-Stack Development** where I can apply forward-thinking AI strategies to solve real-world problems.

3. My Experience / Project Highlights

AI-Integrated Chess Engine * I built a custom chess engine integrating Stockfish with a **Gemini-powered AI commentator** * I engineered a dynamic personality system where the AI adapts its commentary style based on game state * *Tech:* Python, Stockfish API, Gemini LLM

Autonomous Agent Systems (Research & Dev) * I developed a suite of autonomous agents capable of web searching, data synthesis, and workflow automation * I implemented using **CrewAI** and **LangGraph** to explore multi-agent collaboration patterns * *Tech:* Python, LLMs, Agentic Frameworks

ActivityFinder (Full-Stack App) * I designed and deployed a location-based social discovery platform * Features interactive maps, real-time filtering, and a

clean, responsive UI * *Tech:* Next.js, Tailwind CSS, Leaflet Maps

4. My Skills

Top Skills: 1. **Agentic AI** (CrewAI, LangGraph, AutoGen) 2. **Unity & Unreal Engine** 3. **Artificial Intelligence (AI)** 4. **Technical Design** 5. **Full-Stack Development**

My Technical Stack: * **AI/ML:** Python, OpenAI API, Anthropic Claude, Gemini, Vector Databases * **Game Dev:** Unity (C#), Unreal Engine (Blueprints/C++), Technical Design * **Web:** React, Next.js, TypeScript, Tailwind CSS

5. My Education

Hyria Ammattiopisto * Vocational Qualification in Technical Design (Tekninen suunnittelija) * *Focus:* 3D Visualization, CAD, Structural Design & Engineering * *Relevance:* Provided the foundation for my structural visualization and “technical design” approach to software architecture
